Why Choose the Beach Geek to Manage your Tech?

Helpdesk Support with Unlimited Fixes: Our team is available to assist you remotely or onsite, with Same Day and Next Business Day service levels for critical issues.

Cyber Security Monitoring: We prioritise the security of your systems with continuous monitoring and proactive threat detection.

Microsoft 365 Management: We manage your Microsoft 365 environment, taking care of emails, user management, security configurations, and SharePoint, among other services.

Backups and Data Compliance: Ensure the safety and integrity of your data through regular backups and adherence to data compliance regulations.

Quarterly Tech and Cyber Reports: Receive detailed reports on your usage, system performance, and Cyber Security Resilience Levels.

A 10 seat small business with 1 office and maybe a couple of work from home setups; most definitely needs constant IT attention. Hiring an IT staff to look after everything can cost at least

\$60,000 full time + 30% of all the extras. (Super, Personal Dev, Leave, Engagement, etc.)

The Beach Geek can engage the same business for around

\$9,000 inc GST.

10x less investment, a complete Tech Team with more skills and availability and tax deductible.

21%

Disaster Recovery:

Only 21% of Small Businesses have a Full Disaster Recovery Plan

The average cost of a data breach for businesses is estimated to

be **\$3.35** million.

62%

Tech Skills:

62% of Small Businesses lack the in-house skills to handle cybersecurity and respond to an attack.

33% of companies who engaged a Managed Service Provider saved up to **49%**

94%

Cloud Services:

94% of all businesses use cloud services, but

88% of the time a breach occurs with data stored in the cloud, it's the result of human error.

Downtime:

Downtime can cost up to

\$2000 per hour for a Small Business.

Your One Affordable Tech Team. Say goodbye to surprise bills and hello to seamless collaboration and round-the-clock support.
