

Upgrade Your Communication with Cloud Phone Systems

Efficient and Cost-effective Phone Solutions for Your Business

Introducing Our Cloud IPPBX Phone Systems. Enhance Your Business Communication with Advanced Features and Integration.

- Robust Cloud IPPBX with Microsoft Teams Integration
- Flexible Options: Handsets or Softphones
- Onsite Installation or Plug and Play Delivery
- Expert Assistance for Seamless Setup
- Customizable Call Flow, Voice Recorded Menus, and Call Reporting

Call Routing and Forwarding:

Route incoming calls to specific extensions or departments based on predefined rules.

Set up call forwarding to ensure calls are forwarded to the right person or device.

Call Recording:

Record and store incoming and outgoing calls for quality assurance, training, or compliance purposes.

Auto Attendant and Interactive Voice Response (IVR):

Create customized voice menus to greet callers and provide self-service options.

Allow callers to navigate through menu options using their phone keypad.

Call Queuing and Waiting Room:

Place incoming calls in a queue and play waiting messages or music.

Provide estimated wait times and position in the queue for callers.

Voicemail and Voicemail-to-Email:

Offer voicemail functionality for missed or after-hours calls.

Enable voicemail-to-email functionality to receive voicemail messages in email format.

Call Transfer and Conferencing:

Facilitate call transfers between extensions or departments.

Support conference calls with multiple participants for collaboration and meetings.
